

VIVA REPORT

Dear Student,

Please find the viva report. On completion of the project, you must complete your viva through your academic guide, get the report filled up and upload it in the portal.

Viva Report	
Student Name	Naveen Shaw
Project Title	RIO-125: Set up docker container for application development using BlockChain network Batch 01
Academic Mentor Name	I don't have an academic mentor.
Academic Mentor Remarks	<ol style="list-style-type: none">1. Knowledgeable about how to configure Linux Environment Environment. I learned about dependencies.2. Understand the concepts of image execution and construction using blockchain, custom images, and various frameworks and dependencies. Real-time use of the3. blockchain has been shown to be promising in a wider field of view.4. Using ganache and truffle, creating and actually testing a blockchain network was great, and learning about transactions was very insightful.5. Smart contracts are one of the key topics that caught my attention and as a trading and banking application, I learned a lot about the process of the application.6. I understand the value of researching and working on this topic.

Feedback: The internship was very competent. In the internship, I was asked to dig deeper into the techniques I had heard, but the main works were explained in this Handson. Various topics such as Ethereum, crypto, blockchain, etc. were something I had never heard of and thought I needed a great experience, but after doing this internship, I am very confident in this subject. I have
